Preface

Message from the CEO

This International Women's Day, we celebrated yet another remarkable milestone at Teens in AI with our 2024 IWD Global Techathon. **Hosting 1,560 teens from 22 countries, this event highlighted the critical role of diversity, equity and inclusion in technology.**

Under this year's IWD theme, "**Inspire Inclusion**", participants tackled vital United Nations Sustainable Development Goals—**Good Health and Wellbeing, Quality Education, and Gender Equality**—using AI and data science to develop solutions for pressing global issues.

Local techathons took place in **17 languages**, exemplifying our dedication to inclusivity and showing how linguistic diversity enriches collaboration and innovation. This multitude of languages facilitated a richer exchange of ideas and ensured that the solutions devised were culturally informed and globally relevant.

With **54% participation from females and non-binary** young people, we are actively contributing towards a more equitable future in tech, where diversity is sorely needed. Our gratitude goes to our Platinum Partner, Sage, for their crucial support in making this event a success.

Reflecting on the Techathon, we are inspired by the creativity and collaborative spirit of our young innovators. Driven by this year's theme of inspiring inclusion, we remain committed to nurturing an inclusive, ethical future in technology, fueled by the diversity and enthusiasm of our global community.

Teens in AI

Programme Overview

Igniting change, one teen at a time

Programme Overview

Connecting people. Improving circumstances. Transforming lives.

Every International Women's Day, Teens in AI hosts a worldwide distributed Techathon for teens aged 12 to 18. This hackathon-style event (both virtual and in-person) brings young minds together to tackle real-world challenges using responsible AI and Data Science for social good.

The 2024 IWD Global Techathon saw an incredible 1,560 motivated teens from around the world collaborate to shape the future. Focusing on the critical United Nations Sustainable Development Goals (SDGs) of **Good Health and Wellbeing**, **Quality Education**, and **Gender Equality**, participants addressed issues deeply relevant to the global community.

Diversity drives innovation! We're delighted to have achieved a mission-aligned participation rate of **54% among females and non-binary young people**, propelling the tech and AI industry toward a more balanced and inclusive future. This progress helps address the current global disparity, where only 26% of individuals in data and AI fields are women.

Teens from 22 countries across 27 locations participated, from the UK and Europe, to Africa, the Middle East and Asia, with a total of **17 languages worldwide**.

Working with our Platinum Partner, Sage, we are delivering impact by inspiring inclusivity and empowering the next generation of AI enthusiasts to shape a more diverse and ethical future!

Flagship location

Newcastle University, United Kingdom

This year, we were proud to have had the opportunity to host a techathon in collaboration with Sage at Newcastle University. The techathon, held over the weekend of 16-17 March, welcomed teens from all over Newcastle into a fun space of learning and innovation.

Supported by **Mentors from Newcastle University, Sage, and other local organisations**, the participants worked together on projects addressing a United Nations Sustainable Development Goal for Social Good.

The participants were passionate and excited to be utilising their newly acquired skills in **Design Thinking, AI and Machine Learning**, and **Ethical AI** to build projects that ranged from wearable devices to track the wellbeing of pregnant women, to an app which aimed to support young people with their mental health by providing a virtual journal and a chatbot.

We extend our gratitude to Sage and Newcastle University for their invaluable partnership and unwavering support which made this techathon possible. Special thanks also goes to everyone who contributed their time and expertise, including Mentors, Judges, and Speakers.

Teens in AI

Flagship location

Johannesburg, South Africa

South Africa delivered another successful IWD2024 Global Techathon!

Held over two days at **St Stithians School**, the event welcomed not only their own students but also teens from the non-profit organisation, **Thandulwazi Maths and Science Academy**.

The **71 participants** collaborated on projects addressing a United Nations Sustainable Development Goal for Social Good. Thanks to expert mentoring from Teens in AI's Platinum Partner, **Sage**, the teens leveraged their newly acquired knowledge of **Ethical AI, Design Thinking** and **Coding** to develop impressive projects.

We extend our gratitude to our returning Local Ambassador, **Lulu Burger**, and the staff and parents at both St Stithians and Thandulwazi who ensured a safe and enriching experience for the participants.

A big thank you goes to everyone who contributed their time and expertise, including Mentors, Judges, and Speakers.

Impact in Action

Geographically diverse participation

Examining the geographical distribution of our participants, the **Middle East, Asia and Africa region emerged as the most represented, constituting 58.2%** of attendees.

We had a truly global participation this year, with a diverse cultural spread.

This international representation underscores the global reach of our programme, showcasing its ability to attract talent and interest from around the world.

Teens in AI

Teens in AI

Diversity in Action

A focus on girls and underrepresented communities

Diversity in Action

Female and non-binary

The IWD Global Techathon 2024 saw a total of **1,560 registered participants** from around the world.

54%

identified as Female and
Non-binary

Diversity in Action

Age range

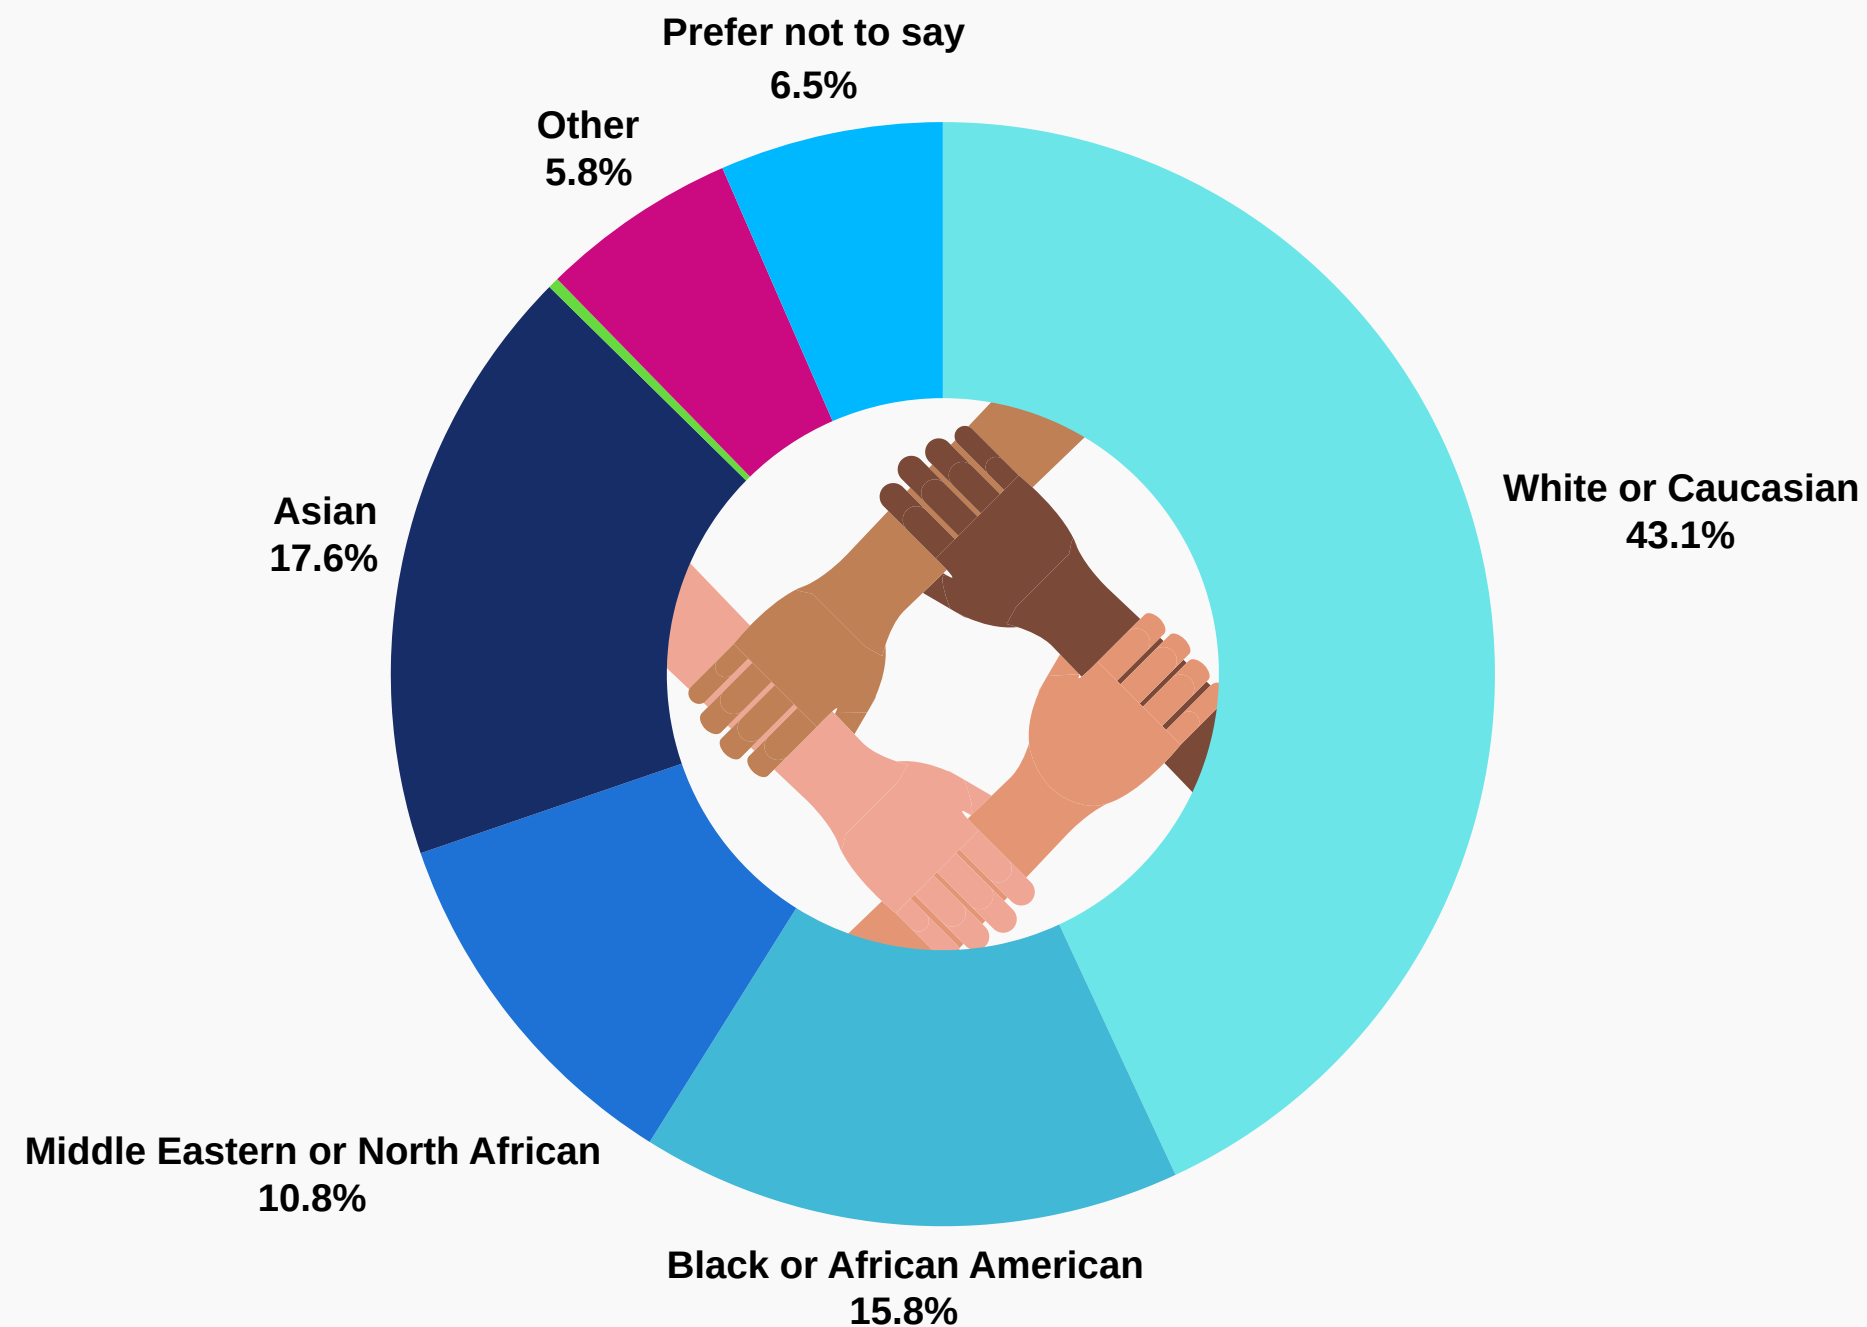

We welcomed a diverse range of young people, with ages ranging from 11 to 19. This mix included both newcomers and alumni from past programmes.

Perhaps not surprisingly, 16-year-olds made up a quarter of the group (26%), suggesting that this age group is starting to think about their future careers. Meanwhile, the presence of 11-year-olds demonstrates a budding interest in AI and technology, even at this young age.

Diversity in Action

Ethnicities

Ethnic diversity is high on the agenda in achieving success for the IWD programme.

41% of participants this year came from diverse ethnic backgrounds.

This is a testament to our commitment to creating a welcoming and inclusive environment for young people of all backgrounds.

Diversity in Action

A focus on State-educated teens and those on scholarships

Skills Assessment

Understanding participant self-assessment

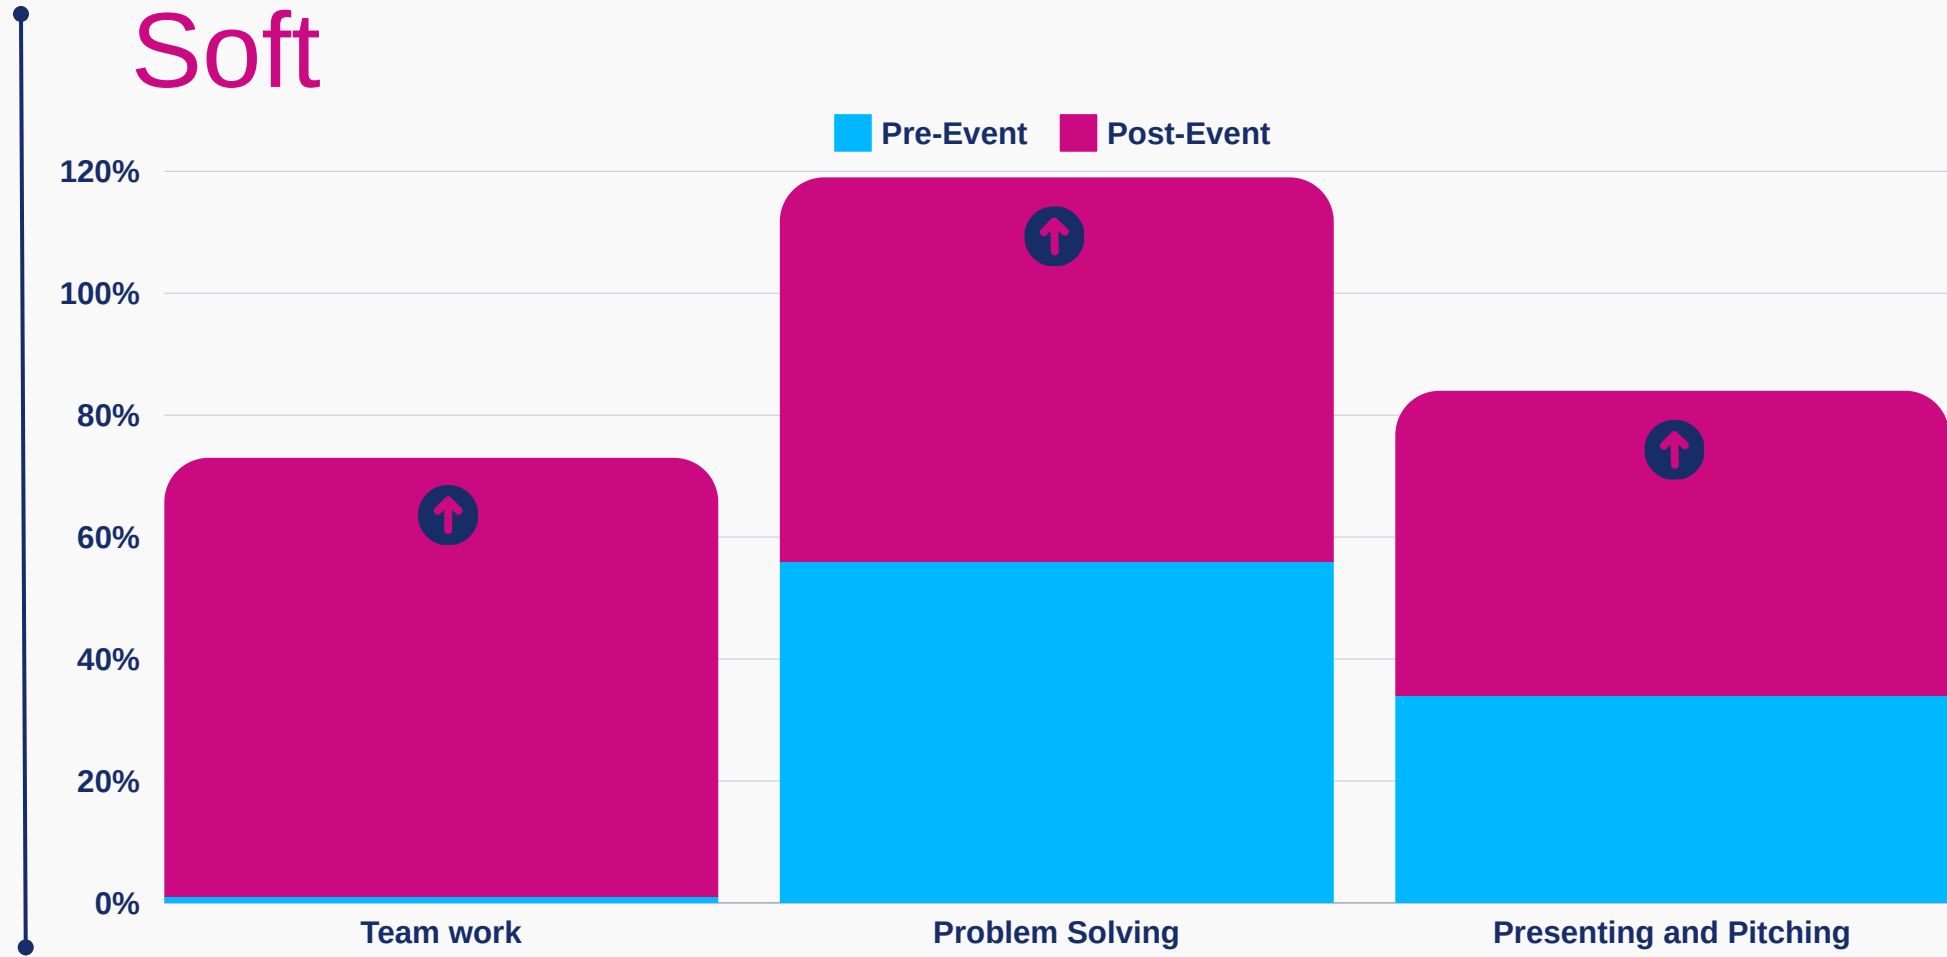

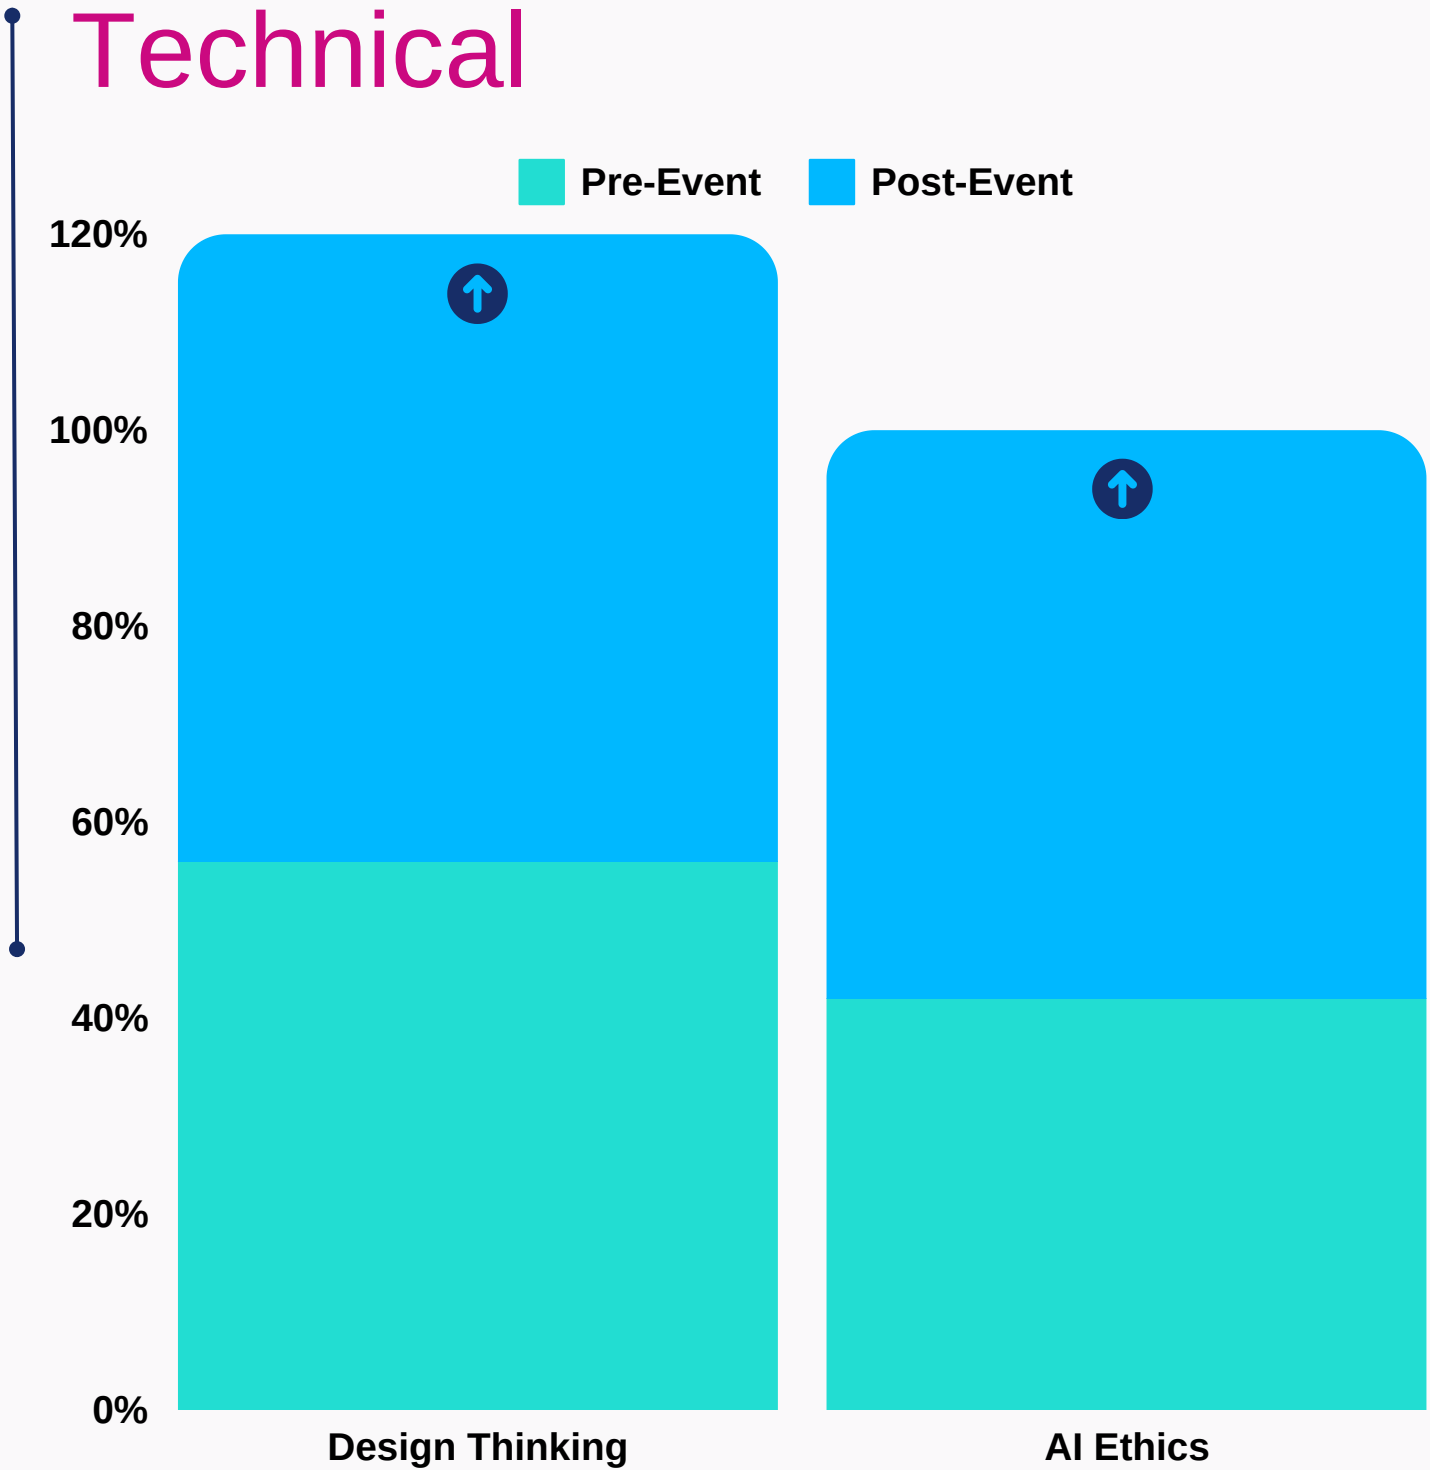

Programme Satisfaction

88% of participants in 2024 found that the programme improved their overall technical and soft skills

- 63% of participants expressed a **greater understanding of how tech/AI can be used in the real world**
- 58% of participants expressed that, having participated in the programme, they have **greater understanding of the importance of ethics in tech/AI**
- 72% of participants expressed that the programme **helped them understand the importance of teamwork**
- 90% of participants expressed that they are now **certain that they want to pursue a career in tech/AI**
- 88% of participants stated that their experience was **'Helpful' and 'Very Helpful' in planning for their future**
- 98% of participants stated that they are now interested in attending **future Teens in AI events**

Skills Assessment: 2024 programme

This comparison, based on participant self-assessments, shows the percentage of respondents' understanding and proficiency in key areas before and after this year's programme.

Their Futures, Our Responsibility

Inspiring their future

Deliberating on and shaping a career path involves introspection and understanding.

After this year's programme, participants shared their envisioned futures in Tech and AI. Interests ranged from Computer Science and Software Engineering to Gaming, Cyber Security, and HealthTech**.

30% were undecided about their career focus, likely due to their younger age and ongoing exploration of passions.

Key:

Cyber Security: 3.10%

Health/Medical Technology: 1.68%

EdTech: 0.27%

**Other fields of interest include Aerospace/Aviation Engineering, Blockchain, Robotics, AI Stock Market Analysis, Defence Industries, E-commerce, Entrepreneurship, Mechanical Engineering, and more.

Skills Assessment

Mentor participation

IWD programme Mentors are more than just technical experts. They bring real-world experience in AI, tech, and business across multiple industries, and also offer practical, experience-based insights.

Their dedication elevates participant experience, fostering a supportive environment where critical thinking, creativity and innovation can thrive.

The Teens in AI Inaugural IWD Community Award

What makes a team exceptional

The team's efforts were exceptional, generating significant national - and even international - media coverage for the event. The team successfully secured government sponsorship for the venue and impressive prizes for winning teams. Their commitment was evident in the quality of their work, consistently exceeding expectations.

They maintained excellent communication, proactively asking clarifying questions and demonstrating a genuine willingness to go the extra mile. The prizes they offered were truly outstanding, reflecting high production value and significantly enhancing the overall perception of Teens in AI and the IWD Global Techathon programme.

The Teens in AI team is immensely proud of the team's entrepreneurial, enterprising and collaborative spirit!

Local Ambassadors from Ankara, Turkey:
Oğuzhan Şinik and Ulaş Dilek

This is not only for me but for our community. I'm so proud of all the teams and the Teens in AI staff who helped us reach this achievement.

Programme Highlights

Participant consensus

“ The techathon has given me a platform to **learn new skills in tech and has helped me select a career in the AI field**. I also **gained good ideating skills and it has boosted my mental health** too because it helped me to **think critically** and associate with people of different backgrounds. I am grateful for Teens in AI and my Local Ambassador from Eclectic Love for organising this programme and enabling me to learn new things that will lead me to a successful career in the future and make the world a better place for all.

~ Sefam, 13, Ghana

“ One highlight for me was the **insightful machine learning panel discussion**. The experts shared valuable insights and practical tips, making complex concepts accessible to everyone. Their discussions sparked new ideas and **fueled my passion for exploring the possibilities of machine learning**. Overall, the techathon was a fantastic opportunity to learn, connect with like-minded individuals, and push the boundaries of technology.

~ Zain, 17, UK

“ Seeing other students around me who were passionate coders only **helps to drive my goals for the future**. As well as this, **presenting to the judges was one of the most important experiences** that I might've ever had, because I had to overcome the immense fear through bravery, and learn from other groups what it takes to sell a good idea.

~ Aidan, 16, UK

Teens in AI

Programme Highlights

The Judges' voice

“ It's deeply inspiring and humbling to see the quality of what's been delivered. The ambition in some of the projects; to solve real life problems and problems that society has. The level of problem solving has been really outstanding and well executed.

~ **Gustavo Zeidan, Chief Information Security Officer, Sage**

“ I couldn't be more proud. Your creativity, your approach to addressing issues that we all see around us - and even those that we don't see - you've been able to pick them up. I love how you are taking hold of these tools and making it work for you because that's what it's meant to do.

~ **Magdalene Amegashitsi, Senior Manager: Data & AI, Avanade**

“ Some of the ideas were simple, but that's why nobody thought about them in the way the participants did. I think they've done a very good job and were very proficient.

~ **Roberto Maranca, Energy management: BU Data Officer, Schneider Electric**

“ I really love the way they've thought global, and thought about impact. All their ideas were amazing.

~ **Irene López de Vallejo, Next Economy Agitator, CTIC Technology Centre**

Programme Highlights

Featured Speaker views

“ Diversity and inclusion are at the heart of how we do business and how we give people opportunities. **Partnerships like ours [with Teens in AI] help us to build a more inclusive society.**

~ Cadence Willis, VP, Sage Foundation

“ I'm so grateful that you guys [Teens in AI] have an organisation that is working with teenagers and in such an empowering way. If we don't have more girls, children, accessing opportunities in A. I, then we don't have representation, which would mean we're not working towards an equitable future. So thank you Teens in AI for this platform.

~ Naomi Webster, Senior Manager: Strategic Support Public Protector South Africa

“ The teens displayed three qualities, which I think we've seen in abundance; **that is belief, the ability to be brave and also be a force for good.** I don't think there's ever been such an exciting time in the industry. **It's given me great hope for the future.**

~ Karl Havard, Managing Director, Taiga Cloud

Programme Highlights

How Mentors felt about their involvement and the programme

“ The experience gained for me is very important, I learned a lot together with my team. A very good collaboration took place with the Technical Mentor, who was extraordinary, professional. It exceeded all expectations. The work process was so interesting. Thank you for that.

~ **Salome Chichinadze, Georgia**

“ What made the experience even more refreshing was to see young people being at the forefront of the solutions that they would like to implement. This changed the paradigm of not only having to find challenges and issues but to also implement the kind of solutions they think would be viable using AI. It's inspiring to see young minds engaging with technology.

~ **Rebecca Medingoane (Sage), Johannesburg**

“ I would like to say thank you to Teens in AI for empowering my young, passionate teenagers into the tech industry, and thanks to other Mentors and teens for showing great cooperation up to the end of techathon. They should expect more from me in the tech industry. I can't wait to see my fellow Mentors again in coming events.

~ **Asha Kisonga, Tanzania**

Programme Highlights

Local Ambassador views on their involvement in the programme

“ The feeling of ecstasy because I was able to see my kids from so many different backgrounds come together. To even see how, let's say, how interested in tech, especially that the girls were even afterwards. They continue to grow and continue to develop.
~ **Patrice Robertson, Ghana**

“ We are very grateful for this opportunity to you and thank you for organising. We are really very happy to be a part of this techathon. I'm really grateful to our amazing team.
~ **Kateryna Molnar, Ukraine**

“ It is hard work and takes a lot of time to pull it off but so worth it because our students are forever changed!
~ **Lulu Burger, South Africa**

What is Teens in AI?

by Aroged — March 3, 2024 in Technology

My Journey as a Local Ambassador: Organising a Hackathon Amidst Challenges

A few days ago, I was invited by [Ministry of Digital Transformation of Ukraine](#) and [Ministry of Education and Science of Ukraine](#) to give a lecture on design thinking for Teens in AI students. It was a wonderful experience, and I'm happy to contribute to the development of young minds in such an innovative field.

I'm grateful for the opportunity to share my knowledge and insights with the students, and I look forward to seeing how they use the power of design thinking in their future projects

#DesignThinking #UXDesign #UserExperience #ProductDesign #Design #TeensInAI

IWD Global Techathon will take place on 9-10 March at Ankara Technology Bridge with the participation of a total of 50 young people between the ages of 12-18. The team that comes first as a result of the competition will represent our country in the IWD Global Techathon semi-finals. IWD Global Techathon is defined as an organization that encourages the use of artificial intelligence and data science by bringing young people together in teams. The organization, which enables the solution of a global problem in collaboration, is organized online or hybrid.

Teens in AI

Alumni

How we support them and
where they are today

How we are supporting our 2024 IWD Global Techathon alumni

The winning teams

Each team member receives a **brand new tablet computer**, perfect for staying connected and on top of their AI learning journey. All team members will **gain access to both the Image Pathway Beginner and Intermediate courses**, providing a comprehensive foundation in AI image processing. Plus, they'll receive an exclusive invitation to attend the 2024 AI4Good Incubator free of charge. The team will also meet with the **Sage AI team**.

Every team member received a **Raspberry Pi kit**, a powerful tool for building and experimenting with real-world AI projects. They will also enjoy a **50% discount on any Image Pathway course**, allowing them to further specialise their AI skills. Like the 1st place winners, they'll also be invited to attend the AI4Good Incubator for free free of charge. Furthermore, the team will also have the opportunity to meet the **Sage AI team**.

The team will be **mentored by Teens in AI's senior leadership**, gaining invaluable insights from industry experts. They also received **one free Teens in AI course of their choice**, allowing them to pursue a specific area of AI that interests them. In addition, they'll receive an invitation to attend the AI4Good Incubator free of charge. The team will also receive mentorship from Roberto Maranca, Energy Management: BU Data Officer at Schneider Electric.

Teens in AI

Alumni

Where are some of our alumni today?

Andreea Giurgiu, EMEA Operations Intern, Uber

Andreea is currently a 3rd year student in Artificial Intelligence with a minor in Data Science and an Honours degree. She also works as an Operational Manager Intern at Uber. A proud Teens in AI Ambassador for four years, where she aims to inspire younger generations to change the world through Artificial Intelligence.

Luca Marchal, Application Developer & Designer, Monster Energy

Luca started his AI and coding journey at the tender age of 13 with Teens in AI. With over a decade of experience tinkering with code, he has come to relish the marriage of creativity and technology. Beyond code and design, his free time is filled with the sounds of DJing, photography, and the (hopefully) graceful pursuit of skateboarding.

Sara Conejo Cervantes, Data Scientist, Expedia Group

Sara is a Data Scientist at Expedia Group and Teens in AI alumna, who champions gender diversity in STEM. With a Mathematics and Computer Science degree, Sara presents at global conferences and actively promotes women and girls in technology through various initiatives.

Teens in AI

Setting the Benchmark

Editor's Note

Setting the benchmark

Editor's Notes

Having joined Teens in AI after the IWD programme closed in 2023, this was the first IWD I experienced. I even had the privilege of Moderating the Virtual Panel, and coming away from the inspiring experience I looked forward to reviewing the data when benchmarking this year's campaign against 2023.

The IWD Global Techathon stands as a beacon of progress, a platform where diversity, education, and innovation converge. With a significant 93% increase in the number of global locations on the previous year, 2024's metrics and milestones mark a significant leap forward, both quantitatively and qualitatively.

Let's focus on diversity—a cornerstone of the Teens in AI mission. In 2024, an impressive 43% of participants came from diverse ethnic backgrounds, making great strides towards inclusivity. This in itself underscores the programme's commitment to fostering a global community representative of varied cultures and perspectives, transcending geographical boundaries to unite aspiring technologists worldwide.

We had a significant increase in total registered teen participation this year, soaring to 1,560—a remarkable 348% surge compared to the previous year. This exponential growth not only demonstrates the escalating popularity of the programme but also underscores its influence within the tech ecosystem. It signifies a widening reach, amplifying its impact on nurturing future innovators and tech leaders.

The resounding vote of confidence from participants is reflected in the overwhelming endorsement of future engagement, with 98% expressing their intent to return for future Teens in AI Programmes—a 47% increase from 2023. This remarkable uptick is a clear indicator that the programme's efficacy in cultivating a supportive and enriching environment, empowering our young people to envision their continued growth within AI.

Bev Chislett
Head of Marketing

Continued overleaf

Setting the benchmark

Editor's Notes

Beyond numbers, post-event feedback offers valuable insights into the Techathon's effectiveness in enhancing participants' skills. Ratings in technical and soft skill areas like Coding Improvement, Design Thinking, Team Work, Problem Solving, and Pitching illustrate incremental growth and proficiency—cultivating well-rounded responsible tech professionals equipped not only with technical prowess but also with essential soft skills vital for success in collaborative environments.

Participants indicated a **43% increase in Coding Improvement** compared to 2023, highlighting the fostering of technical skills vital for navigating tech advancements. Similarly, a **64% increase in Design Thinking** illustrates the emphasis on creative problem-solving, reflecting an enhanced ability to innovate solutions—a testament to the programme's holistic education approach.

In essence, this year's programme stands as a testament to the power of inclusivity, education, and innovation. As we celebrate the milestones and lessons learned, let us reaffirm our commitment to fostering an inclusive tech ecosystem that empowers and uplifts aspiring technologists worldwide.

Together, we are igniting change—one teen at a time. It takes a village. Thank you for being part of ours.

Bev Chislett

Head of Marketing, Teens in AI

PS: Do read on for more information about our Programmes and how we deliver impact, our 'Why', our global reach and impact in numbers since 2021.

estimates 97 million new jobs will emerge by 2025 to enable humans and machines to work together.

Stating that:

44% of workers' core skills are expected to change in the next five years

By 2025, AI and ML specialists will be the second most in-demand **Jobs**, second only to Data Scientists and Analysts

By 2027, Analytical Thinking, Creative Thinking, AI and Big Data will be top in-demand **Skills**

Teens in AI

Our Programmes

How we deliver impact

AI4GOOD INCUBATOR 2024

The AI4Good Incubator is a **global 5-day virtual bootcamp** style programme where teens aged 12-18 work in teams to build a tech-based project, inspired by a **climate-related** United Nations Sustainable Development Goal.

♀♂ All genders are welcome to participate!

2024 programme dates:
19-23 August 2024

What teens can expect

Over the 5-day programme teens will learn and experience:

How AI works, its ethics and why it matters

How to develop code responsibly

How to build a prototype

A 'day in the life' of an entrepreneur

How to pitch a project in front of a judge panel

Coming up!

AIADVENTURES

Courses

Teens in AI

Launched on 25 April 2024

Our **online, self-paced** AI Adventures **courses** teach teens the skills the industry is looking for both today and in the future, with AI ethics at its core.

- All our courses use project and problem based learning methods
- Learning styles includes video, glossaries, presentations, text, case studies coding challenges, projects and short quizzes

Learn

Our instructors are AI experts who have worked on real-world projects and will provide teens a good foundation into AI

Achieve

Teens will learn practical skills that can help them solve complex problems and develop creative solutions

Succeed

With our courses, teens will be ready for future career opportunities across many different industries

Just launched!

Our Programmes

AIADVENTURES Courses

Our online Courses empower teens to discover their passion for AI. These self-paced courses foster skills in data analysis, programming, and problem-solving, helping teens become future change leaders. [Find out more here](#)

Teens in Action Forum Your Voice, Your Future

A virtual, monthly event series for teens aged 12-18 where global AI leaders empower and engage young minds in thought-provoking conversations and discussions centred around AI-based topics. [Find out more here](#)

AI4GOOD INCUBATOR

Run in August annually, the Incubator is a global 5-day virtual bootcamp style programme where teens aged 12-18 work in teams to build a tech-based project, inspired by a climate-related United Nations Sustainable Development Goal. [Get involved here](#)

Our Bespoke Solutions

Our tailored consultancy solutions help corporates, governments, and educational institutions meet community-driven goals, offering support to navigate and achieve strategic objectives effectively. [Find out more here](#)
